

Eurofins acquires Biotech Laboratories

Eurofins is proud to announce today the acquisition of the business of **Biotech Laboratories from Sullivan & Nicolaides Pathology/Sonic Health Care.**

The acquisition is an additional step for Eurofins across the Queensland Environment, Food, Hygiene and Water Testing markets and further adds to Eurofins growing network of Laboratories across Australia and New Zealand.

Sefton McGraw, Managing Director for Eurofins Environment Testing in Australia and New Zealand stated:

“I am very pleased to welcome Biotech Laboratories and staff to Eurofins and be able to continue the services that Biotech Laboratories have built across its Queensland and National client base over the last 25 years. Under Eurofins I am sure that we can build those relationships even further and extend our operations wider across the Queensland markets. The addition of Biotech Laboratories to our current Queensland Laboratory strengthens our analytical services across the Water Testing & Food Testing Markets.”

Glen Pinna, General Manager Biotech Laboratories Pty Ltd commented:

“We are extremely pleased to write this new chapter of the Biotech Laboratories history and join the Eurofins network. Moving from the strength of Pathology-focused Sonic Health Care, across to Eurofins who are aligned with our core Microbiological Testing services will provide great growth for us across all the sample type platforms. This includes the testing markets that we currently operate in, Food, Water, Air, Cosmetics and Environmental testing. We also envisage great potential gains for our clients and staff alike.”

Biotech Laboratories operation will hereinafter be trading as **“Eurofins | Biotech Laboratories”** and will be relocated immediately from its current home with Sullivan Nicolaides to our Eurofins Brisbane Laboratory located in Murarrie.

All enquiries can be made through our National network of Laboratories via the contact details below or directly to our **Eurofins | Biotech Laboratory on (07) 3847 9488**
